

## Invention Sharing

Talk to at least 2 other people about your invention and ask for feedback. Explain your invention idea, the problem it solves, how it works and how you plan to design it. Record the feedback to evaluate whether or not you can use it to make improvements on your design.

**Evaluation and Reflection:**

You do not have to act on every suggestion, but you should reflect on them and evaluate how they could help you improve your design. Think about each suggestion offered. What changes can you make to your design. List and/or draw them here:

**My Design Improvements:****My Revised Design Drawing:**A large, empty rectangular box with a black border, intended for drawing the revised design. The box is currently blank.
